

Sustainable MPS on Platform Monthly Summary

31 March 2025

evelyn
PARTNERS

Key information

Reporting date: 31 March 2025

Launch date: 30 September 2011.
However, the Launch date for both the Conservative and Maximum Growth portfolios is 31 October 2014.

Base currency: Sterling (GBP)

Performance calculations: All performance shown is on a total return basis with income reinvested. Performance data is sourced from FactSet and shown net of fees borne within each of the underlying investments of the portfolio but does not include Evelyn Partners investment management fee.

Evelyn Partners investment management fee: 0.20% per annum - this fee is not included in the performance data. The effect of this fee on the portfolio's performance would be to reduce the capital returns of the portfolio. The fee does not include any applicable platform fees, adviser charges or the charges of the underlying investments.

Guideline minimum investment: £20,000

Risk Profiles: This service is intended for use by investment professionals only. Defaqto, Dynamic Planner, Evaluate, FinaMetrica, Oxford Risk and Synaptic Risk are independent financial research and software companies specialising in rating, comparing, and analysing financial products and funds. Please see individual factsheets for specific portfolio risk rating.

Capital at risk

The value of investments and the income from them can fall as well as rise and you may not receive back the original amount invested. Past performance, or any yields quoted, should never be considered a reliable indicator of future returns. Please read the key risks overleaf and the individual portfolio factsheets for more information.

Important information

Yield: per annum - this is the average income generated by the assets held within the portfolio over the last 12 months as a percentage of the portfolio value and is not a guarantee of future income.

Underlying ongoing charges figure (OCF) estimate: this is a total annual cost estimate of the operating expenses incurred by the underlying investments of the portfolio, the effects of which will have a drag on performance. These costs are borne within each underlying investment and will be included within all performance shown on this factsheet.

Underlying transaction cost estimate: this is an estimation of the total annual costs incurred by each of the underlying investments of the portfolio for the trading activity conducted during their day-to-day management, the effects of which will have a drag on performance. These costs are borne within each underlying investment and will be included within all performance shown on this factsheet.

Key risks

- The value of investments and the income from them can fall as well as rise and you may not receive back the original amount invested.
- There can be no assurance that any portfolio will achieve its investment objective. You should be made aware of the risks associated with investing and we would recommend discussing these risks with your Financial Adviser and/or Investment Manager in more detail.
