Holdings	32	4048
Volatility (%)	13.2	11.2
Effective yield (%)	1.5	--

Fund aim

The Fund aims to achieve a return by combining both long term capital growth with the generation of some income. The Fund will invest primarily in regulated collective investment schemes globally, but will maintain a UK and European bias.

Important notes:

¹ Performance figures are shown in GBP, gross of any initial charges, net of ongoing charges and include any income reinvested (net of UK Basic Rate tax) at ex dividend dates to 31 October 2022. The effect of the deduction of any initial charges (where applicable) would be to reduce returns. Periods over 1 year are annualised. Source: Evelyn Partners Investment Management LLP, Morningstar Direct.

² The ongoing charges figure (OCF) which includes the annual management charge (AMC) is for the year ending 5 April 2022.

³ Portfolio risk and statistics - Volatility measure used is standard deviation (annualised). Yield type is historic.

⁴ IA Sector data has been chosen as a comparator benchmark to give an indication of how the Fund is performing against other similar funds. The MSCI PIMFA index has been chosen as a comparator benchmark as it best reflects the Fund's asset allocation. The Fund does not target, nor is it constrained by these benchmarks.

Figures may not add to 100% due to rounding.

Risk warning: The value of investments can go down as well as up and investors may not receive back the original amount invested. Past performance is not a guide to future performance. The Fund invests substantially in units of UK and European regulated collective investment schemes. The Fund may also invest in closed-ended investment trusts which may be geared. Such gearing will tend to make the performance of the trusts more volatile and therefore represent a higher risk to capital than companies without gearing. The Fund may from time to time invest in substantially only one country and will therefore have greater exposure to the market, political and economic risks of that region than if it was more diversified across a number of countries. Investments in emerging markets may involve a higher element of risk due to political and economic instability and underdeveloped markets and systems. Exchange rate changes may cause the value of investments to go down as well as up. Investments in higher yielding bonds issued by borrowers with a lower credit rating may result in a greater risk of default and have an adverse effect on income and capital value. Investments in lower rated and unrated securities may be more volatile than higher rated securities and therefore represent a higher risk to capital. The ACD's annual management charge will be allocated equally between capital and income. All other expenses other than those relating directly to the purchase and sale of investments will be allocated to income. Please read the Risk Section of the Fund's Prospectus and Key Investor Information Document (KIID) for a fuller description of the risks prior to investing.
