Capital at Risk. The value of investments and the income from them can fall as well as rise and you may not receive back the original amount invested. Please read the important information overleaf.

Portfolio objective

Appropriate for an investor with a two-year time horizon or more, who seeks low volatility of returns, is comfortable having typically around 30% of their portfolio in equities. The projected annualised rate of return over the long term is UK CPI +1%.

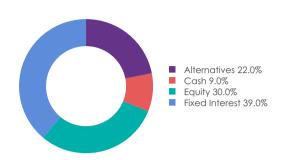

Risk

Investors should be able tolerate a loss of up to 10% of the value of their portfolio in any one year, based on the assumption of 95% probability.
