Evelyn Multi-Asset Funds

These Evelyn Partner Multi-Asset Funds provide a tax-efficient vehicle through which to access direct stocks/shares, collective investment funds and bonds, including corporate bonds. With four different strategies, each fund is linked to our sophisticated risk profiling process to ensure investors have exposure to the optimal blend of available asset classes. Drawing on the expertise of our extensive internal research resource and overseen by a dedicated team of the firm's most senior investment professionals, each fund is dynamically rebalanced to meet a range of clearly articulated inflation plus return targets.

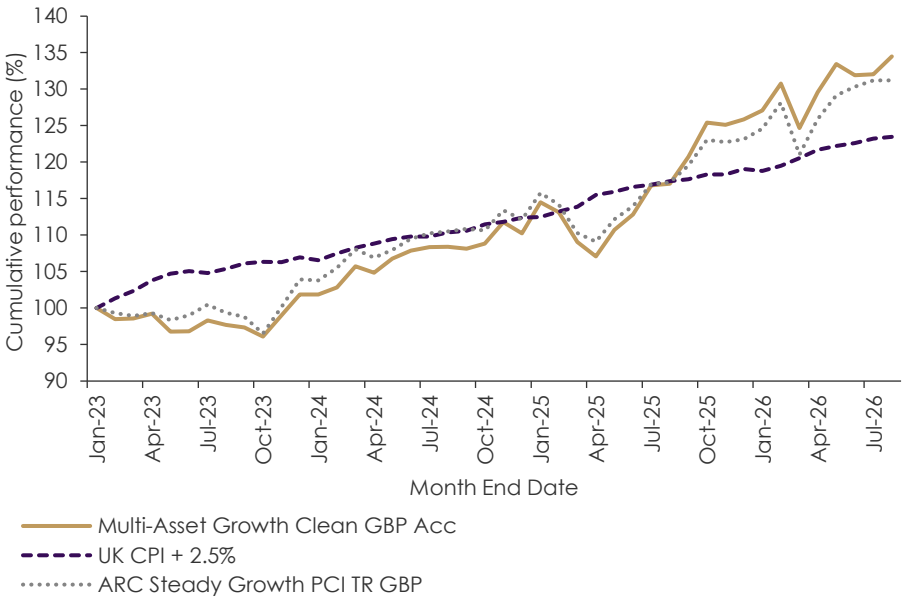
Investment objectives of the fund

The investment objective of the Fund is to seek to achieve capital growth over the long term, investing directly in equities, bonds and alternative assets.
The portfolio will primarily be comprised of equities, normally representing up to 80% of the portfolio. The Fund will also directly invest in a range of bonds including sovereign, supranational/sovereign-related and/or corporate bonds (with a focus on investment-grade or equivalent rated issuers). The portfolio will also include alternative assets such as hedge/private equity funds, precious metals and real assets e.g. infrastructure and REITs and some cash.

Cumulative performance (%)

Cumulative performance (total / aggregated return over the period) can often be a useful indication as to what an investment has achieved in nominal terms (i.e., not accounting for inflation) over a defined period. The since launch performance data covers the period from Launch Date to the Reporting Date (detailed within the Key Information section).

The chart shown below aims to inform you how the portfolio has performed since inception against the appropriate comparators and represents the portfolio's ongoing performance. The comparators used are for comparison purposes only to help you understand the performance of your portfolio relative to an appropriate benchmark portfolio with similar levels of risk.



All figures shown refer to the past and past performance is not a reliable indicator of future results.

Key Risks

Details of all risks and further information can be found in the section of the Prospectus entitled "Risk Factor". Found here: www.evelyn.com/services/funds/ However key risks are outlined below:

Liquidity risk: In difficult market conditions, the Fund may not be able to buy and sell investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns. Furthermore, if a significant proportion of the Fund's investments suspend trading or defer trades placed the Fund may in turn be suspended or defer payments to investors.

All figures shown refer to the past and past performance is not a reliable indicator of future results.

Key Risks. Continued

Derivative counterparty risk: The Fund can use over the counter (OTC) derivatives, these are derivatives not traded openly on an exchange and instead are traded privately directly between a buyer and seller, who are referred to as counterparties. These derivatives are used to reduce the impact of holding investments in other currencies (hedging). There is a risk that, one of the counterparties will not be able to pay the money owed to the Fund in the course of carrying out an OTC derivatives trade. In this event your return could be reduced.

Credit risk: The Fund can invest directly in bonds, these carry the risk that the company, country or other entity issuing the bond will be unable to make the interest or any other payments it has committed to. This risk is higher for lower quality, non-investment grade and unrated bonds. However, these bonds typically provide a greater return than lower risk bonds.

Emerging market risk: The Fund can be exposed to emerging markets which compared to more established economies may be subject to greater volatility. Under certain market conditions assets may be difficult to sell.

Foreign-exchange risk: When investments are made in overseas securities, movements in exchange rates may have an effect on the value of that investment.

Operational risk: The Fund is exposed to the risk of bankruptcy of those that act on behalf of the Fund or hold assets on behalf of the Fund. Investors should also note that compensation under the UK Financial Services Compensation Scheme and the Irish Investor Compensation Scheme will also not be available in relation to the Fund.
